0104432.html Новости \* The virus was on the website for 30 seconds or less. \* The virus is not included in any of the AV products known to protect against the infection. \* This is not an official product of Autodesk, Inc. Welcome to the AutoCAD 2008 Spam Protection FAQ. How did this Virus get on to my AutoCAD website? It was not created by me or Autodesk. You must have had a virus or Trojan virus or hacked by a third party. The virus could be e-mailed or linked to your website from other websites. Is my AutoCAD program infected? To find out please download the free Autocad Spyware Scanner from This will scan your Autocad program for viruses and any Trojan viruses. If it finds a virus, the website will offer a recommended fix. Is there a solution for this virus? Yes. We at ASX take the security of our customers very seriously. We have implemented a very effective solution to remove all forms of harmful or malicious software from your Autocad website. If you have any issues, please contact support@autocad.com Важная новость \* This is not an official product of Autodesk, Inc.Q: How to make breadcrumbs less likely to trigger spam? I'm trying to reduce the likelihood that my breadcrumbs will trigger spam. I'm developing a CRM application, and have a field that can be blank or contain a list of products (or any other object, I'm not sure if the admin would use this or not). When a user adds a new entry to that list, it fires a request to the database that adds the entry to the list, which will end up in the page's breadcrumbs. I've setup a filter that automatically converts the title of the page to the title of the list item and then converts the id of the item to the id of the list. But 82157476af
