This is music for a video game. Rarely do I love the music so much for a game, do I buy it. This is great for anyone that loves the Cat Lady, even for anyone who likes dark or oldschool industrial tones.. I bought this and didn't get any of these songs. Has there been a mistake? Really bummed out.. I bought the bundle of The Cat Lady, Downfall, and both of their soundtracks. In my opinion the music is composed beautifully and sounds great. Really goes with the mood of the games, especially the piano parts.. I bought this and didn't get any of these songs. Has there been a mistake? Really bummed out..
